- European Mouflon
- European Roe Deer
- European Wild Boar
- Gredos Ibex
- Pyrean Chamois
- Ronda Ibex
- Southern Ibex
- Spanish Red Deer

Beccite Ibex

Found only in Spain, these majestic animals inhabit the mountains at elevations of 3000-7000 feet, making them one of the most prized and challenging trophies in all of Europe. Spain has four species of ibex -- Gredos, Beccite, Southern and Ronda (named for the different mountain ranges they inhabit), each with it's own, uniquely distinguishing horns.

Roll Over the Names of the Animals to see which region they come from.
